

## **New Pyrotechnic Organization**

We have been asked to support a new pyrotechnic organization in Oregon. Folks located in the vicinity of Oregon might want to take a look at [www.oregonpyro.com](http://www.oregonpyro.com). At the present they are only allowing full members at shoots due to liability issues. This is common. I really don't know much about the group, however, I do know that these folks are long time Pyros who have worked hard to promote and protect the industry. Take a look and if you can, support their efforts.
